[RSVP Required] If you would like to attend, please click the following link (<http://goo.gl/bnSCJ7>) and RSVP no later than **October 7 (Tuesday)**

In 1999 the United Nations declared October 4-10 as World Space Week. These dates were chosen to commemorate two significant events in space history. On October 4, 1957 Sputnik I became the first human-made satellite to be launched into outer space. On October 10, 1967 the United Nations Treaty on Principles Governing the Activities of States in the Exploration and Peaceful Uses of Outer Space, including the Moon and Other Celestial Bodies went into effect.
